

This is your homework for this week , you must complete one challenge from each column . Remember to read each day too  
Your homework must be finished by **Jan 4th**

English	Maths
Write a playscript for your own short film. You might decide to create a Christmas film.	In the song the twelve days of Christmas how many gifts were sent altogether? Show how you arrived at your answer.
Create a graphic novel version of a film or story that you like.	Find out how many households there are in England. If it takes Santa 3 minutes to deliver presents to each household and 2 minutes to get from house to house, work out how long it would take him to deliver presents to every household in England. Give your results in minutes, hours, days, weeks and years.
Watch a film. Write a film review including- what you liked about the film, what could be improved and who you think might enjoy the film.	Find out how many households there are in Telford. If it takes Santa 3 minutes to deliver presents to each household, work out how long it would take him to deliver presents to every household in Telford. Give your results in minutes, hours and days.
Watch a film. Write down a summary of what happened at the beginning in the middle and at the end.	Santa takes 1 day (the 25 <sup>th</sup> December) to deliver his presents. If there are 24 hours in a day and Santa visits 576 houses, how many minutes does Santa spend in each house? You may use a calculator to work this out but remember to show your working.
Watch a film and write down three things you liked about it.	Santa visits 20 houses in a street. He takes 5 minutes to deliver his presents and 5 minutes to eat the cookies and milk left for him. How long does he spend in the street? You may use a calculator to work this out but remember to show your working.
